

## LAPETEK LINA-A

anthracite dishwasher valve

### Product code 21009A

#### Product description

The LAPETEK LINA-A faucet is timelessly stylish, which with its beautiful details emphasizes the look of the kitchen, suitable for both traditional and modern kitchens. The faucet's fresh design is influenced by traditional faucet models, where the operating lever is on top of the faucet, from which it is easy to use and adjust. The spout of the faucet is directed slightly upwards, which makes it more convenient to fill and rinse even taller dishes under it easily. In addition to the kitchen, the faucet is also suitable for use in utility rooms.
