

LAPETEK LIVA-A

eco-faucet brushed gold dishwasher valve

Product code 23035A

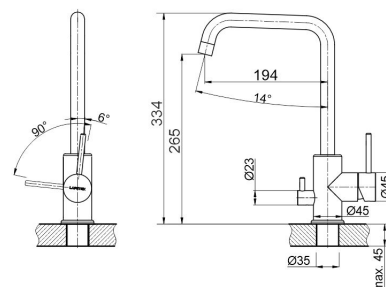

Product description

A stylish and ecological faucet for every kitchen. Its high spout provides ample space for washing large pots and other dishes, and the pleasant, low-splatter flow effectively reduces splashing from the bottom of the sink. The faucet's spout movement can be limited to prevent water from flowing outside the basin. The dishwasher connection is elegantly placed on the opposite side of the operating lever. The LIVA-A faucet has Finnish type approval.
