

LAPETEK LIVA-A

satin gold dishwasher valve

Product code 23058A

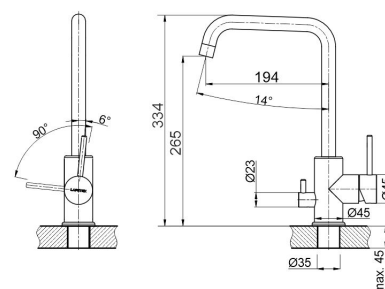

Product description

An ecological and timelessly styled faucet that can also be installed close to the wall. The spout is slightly forward-angled to prevent water from hitting the sink strainer, and its swivel range can be limited if needed. In addition to saving water, the fine, aerated flow effectively reduces splashing from the base of the sink. The dishwasher connection is discreetly positioned on the opposite side of the operating lever, maintaining a clean and elegant overall appearance. The LIVA-A faucet carries Finnish type approval.
