

LAPETEK LETOS

eco-bathroom faucet gold

Product code 31735

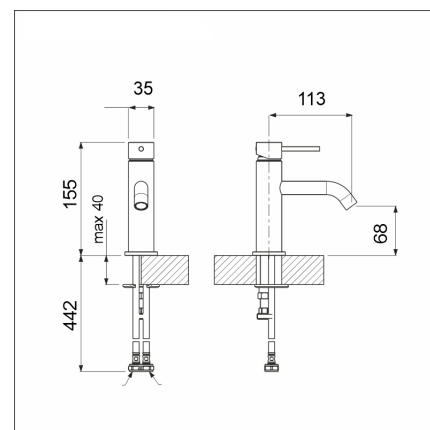

Product description

The petite design and small size of the LAPETEK LETOS faucet series bring modern minimalism to the space. The small size of the faucet doesn't mean that it could only be used with small basins, as the design has taken practicality into account. The spout is designed so that water flows from the faucet at an angle of 37 degrees, which allows it to be used even with a larger basin. You can attach the bidet to a faucet later on and they will be exactly the same color up to the wall mount of the bidet.
