

CUTTING BOARD

(Solis) bambu

Product code 415851

Product description

Bamboo is an environmentally friendly material for cutting boards. The fast-growing plant is a very sustainable material that is ideal cutting board material due to its antibacterial properties. Bamboo absorbs little moisture, is durable and long-lasting and does not consume the knife blade when cooking.

The cutting board is dimensioned to sit firmly on top of the sink. However, due to the natural material, each cutting board is unique and small dimensional differences may occur compared to the given dimensions.
