

GRID

(Subline Pleon) stainless steel

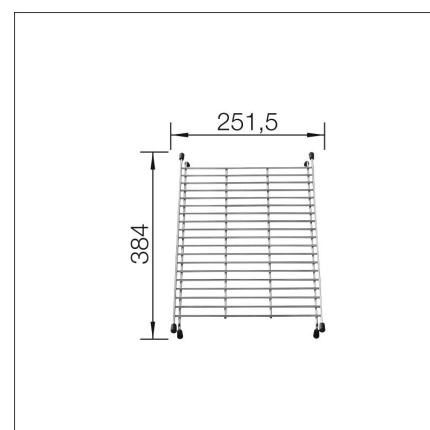

Product code 417850

Product description

The grid fits Blanco Naya, Subline and Pleon pools, forming a practical intermediate level in the middle of the sink. The intermediate level, which sits firmly in place, enables the basin to be used on three different levels, being an excellent addition for drying dishes, pots, buckets or even a dish towel. The shelf can be used equally for thawing frozen foods as well as as a base for a container into which ingredients chopped on a cutting board are transferred.
