

## DSC 06DIM

white/black | dimmable | 6 W | 360 lm | CRI>90

Product code: 62733

### Versatile ceiling lamp

The LIMENTE DSC ceiling light is designed to offer a versatile lighting option that is easily suitable for more than one need. The slim ceiling lamp, about 15 mm, blends in elegantly with the ceiling. The frame of the lamp is white, but with the included magnetically attached cover, the frame can also be converted to black. If the mind changes and you want white from the black lamp frame again, you can remove the magnetically attached cover neatly and easily. The color temperature of the lamp can be adjusted to the desired temperature, either warm 3000 K, white 4000 K or cold 6000 K, depending on which of these best matches the room and its other light sources. The color temperature is selected using the slider on the bottom of the lamp and is selected during installation.

The lamp is available in three different sizes, 6 W, 12 W and 18 W. When one product has several options in terms of size, temperature, color and installation method, it makes the choice of the product easier and it is more suitable for more than one object.

### Dimming and light control

By adjusting the light, you can always customize the light and create lighting that suits your home and the situation. By dimming the LIMENTE DSC, you change the lighting of your home from efficient and bright to dim and cozy. If you wish, you can use the same switch to adjust all the LIMENTE lights in the room, including the various ceiling, panel and furniture lamps. The light adjusts evenly and at the same time, changing the atmosphere of the entire space at once.

### Easy installation

LIMENTE DSC panel lamps are easy and quick to install. Although the lamp itself is square, the mounting hole is round, as it is easier to make a round hole than square one. The size of the installation opening is freely selectable in the specified range (see installation instructions). Thanks to the sliding mounting rail, the luminaire can be mounted in a previously cut mounting hole if its size falls within the range of this adjustment allowance.
