

LUXA-31 (3-IN-1)

socket | white | integrated 24 V driver with switch

Product code: 631224

Dual socket with integrated 24 V LED power supply and switch (2-in-1)

The LIMENTE LUXA-31 is a corner socket that includes a power supply for LED lights and an on/off switch to control the kitchen work space lights. It is quick and easy to install and can be used with all types of LIMENTE LED lights. The tilted design makes the sockets easy to access and you can clearly see in which direction the plug should be inserted. The material is either stainless steel, painted white or black (metal body). The sockets are child proof and designed in Finland.

LUXA sockets have two plug places, 30w power supply and an on/off switch for led-lights. The switch allows you to control for example kitchen work lights. By combining LIMENTE LUXA with LIMENTE profile lights, you will create a stylish combination for your kitchen. The design of the LIMENTE LUXA is similar to LIMENTE MINI sockets, so you can elegantly combine these models in the same kitchen.

Socket color options

The Luxa socket is available in white, stainless steel and black. Stainless steel is brushed and both white and black have a matte finish (matte black and matte white). All color options have a sturdy metal body.

Installation and electrical connection

Specify the location where the power cord will be imported, or use an existing power cord. The power cord is plugged in from the wall. The socket is mounted at an angle against two solid, non-flammable surfaces so that its background does not remain open. The actual fastening is done with the help of the included screws. In one installation, you install both the sockets, the switch and power supply for the LED lights. See the installation instructions for more detailed instructions.
