

SMART 350 SET

wireless light control | remote control

Product code: 640350

Wireless light control for 24 V lights

LIMENTE SMART 350 series offer a simple and stylish option for lighting control, for example in the kitchen and other areas of the home. The lights are controlled by a stylish wall switch (controller) with an on / off function and a dimming feature. Thanks to the slimness of the controller, it looks like a recessed wall switch despite the surface mounting. The controller does not need wiring but works wirelessly, so it can also be placed freely in the desired place in the room. There can be several controls to control the same lights, and with one controller you can control several different lights, making it easy to expand the system afterwards. Lighting control does not require separate electrical work, but is sufficient when there is a socket for the lights. LIMENTE SMART 350 is a complete set with all the necessary parts to control the lighting.

The controller is a stylish surface-mounted switch. You can keep it white or make it black and white with the sticker in the packaging. All the necessary parts are included in the basic set. On / Off works with a short press and a long press dims / brightens the light. Thanks to the slimness of the controller, it looks like a recessed wall switch despite the surface mounting. The system can be used with all LIMENTE 24 V LED lights.

Adjusting the lights

By adjusting the lights, you can customize the lighting and create lighting that suits the situation. By dimming the LIMENTE lights, you change the lighting of your home from efficient and bright to dim and cozy. If you wish, you can use the same switch to control all LIMENTE 24 V lights in the room, including various panel and kitchen workspace lights. The lights adjust evenly comfortably and simultaneously, changing the atmosphere of the entire space at once.
