Wireless light control

LIMENTE SMART 400 series is a simple and elegant solution for lighting control for example in the kitchen. The system does not require any additional electrical work. It suffices to have a socket for the lights. Often the socket is placed, for example above the upper kitchen cabinet, in which case the dimmer is also placed there.

The lights are controlled with modern controls, which have ON/OFF function and dimmer. ON/OFF works with a short press and long press dims/brightens the light. With the CCT model you can also adjust the lamps color temperature (requires a CCT light).

LIMENTE SMART 420

Wireless 24 V dimmer, which is installed between a power supply and a light. The dimmer has corresponding connectors and manifold as the power supply. The manifold can install a maximum of 6 lamps. One dimmer is needed for every light group (power supply).
