

SMART 511

PIR sensor | 24 V

Product code: 640511S4

Presence detector PIR

Automated lighting control is at its best when, the lights are on, when they are needed and where they are needed, without the user noticing. Unnecessary lights on and electricity consumption are reduced while safety is increased. The LIMENTE SENSOR series is designed to automate lighting control in all areas of home.

The system turns on the room lights, closet lights or even the kitchen worktop lights when light is needed. The lights stay on as long as you move within the detection area. Automatic lighting control makes home lighting a new kind of comfort and safety product and at the same time it is also an ecological way to use lights.

Lighting control

LIMENTE SMART 511 works as an automated ON/OFF -switch.

Installation

The LIMENTE SMART SENSOR series dimmer unit and sensor are simple and quick to install and do not require separate electrical installations. First, select the desired operating mode from the dimmer unit so that the sensors work the way you want them to.
