

SMART 520

receiver | 24 V

Product code: 640520

Wireless light control set – timeless design to fit many styles

LIMENTE SMART CLASSIC series offer an easy and stylish solution for light control, for example in the kitchen and other areas of the home. The lights are controlled by a stylish wall switch (controller) with an on / off function and a dimming feature. The controller does not need any wiring, so it can also be placed freely in the desired place in the room. You do not need an electrician to install this product, you can easily install it yourself.

There can be several switches controlling the same dimmers, and with one switch you can control several different dimmers, making it easy to expand the system afterwards. In this way, you can easily solve the light control, for example, in a staircase, where the lights must be able to be switched off and on both from downstairs and upstairs. The wireless control does not require separate electrical installations, only an electrical outlet is needed. LIMENTE SMART CLASSIC is a complete set with all the necessary parts to control the lighting. Wireless light control system always consists of two parts: a dimmer part that comes between the light and the power supply, and a wireless switch. The lights are connected to the wireless switch via a dimmer part, so a dimmer is always needed.

Adjusting the lights

By adjusting the lighting, you can customize it to create lighting that suits the situation in your home. By dimming the LIMENTE lights, you change the lighting in your home from efficient and bright to dim and cozy. If you wish, you can use the same switch to adjust all the LIMENTE 24 V lights in the room, including the various panel and work lights. The lights adjust evenly, smoothly and simultaneously, changing the atmosphere of the entire space at once.
