

SMART 552

LUXUS lightcontrol kit | 24 V | white

Product code: 640552

Wireless lighting control - a hint of luxury with stylish glass frame

LIMENTE SMART LUXUS series offer an easy and stylish solution for light control, for example in the kitchen and other areas of the home. The luminaires are controlled by a stylish glass-framed wall switch (controller) with an on / off function and a dimming feature. On the CCT model (SMART 571), you can also adjust the color temperature of the light (if you have purchased lights with the CCT function). LIMENTE SMART 551, 552, 554 and 571 are ready-made sets with all the necessary parts to control LIMENTE 24 V lights (all spot and profile lights).

The controller does not need any wiring but works wirelessly, so it can also be placed freely in the desired place in the room. There can be several controls to control the same luminaires, and with one controller you can control several different lights, making it easy to expand the system afterwards. In this way, you can easily solve the light control, for example, in a staircase, where the lights must be able to be switched off and on both from downstairs and upstairs. Lighting control does not require separate electrical installations, but needs an electrical outlet. You do not need an electrician to install this product, you can easily install it yourself. The light control set LIMENTE SMART 551 includes one LIMENTE SMART 540, 24 V dimmer part and one LIMENTE SMART 542 switch (controller). You can also order controls and dimmer parts separately as needed. You need one dimmer for each light set (power supply). For example, if your kitchen has a set of three LENOX luminaires and a separate LINEA as indirect light on the top cabinet, you will need 2 dimmer parts to control the LENOX and LINEA separately. If you want to control them at the same time, one dimmer part is enough to connect all the lights.

Adjusting the lights

By adjusting the lighting, you can customize it to create lighting that suits the situation in your home. By dimming the LIMENTE lights, you change the lighting in your home from efficient and bright to dim and cozy. If you wish, you can use the same switch to adjust all the LIMENTE 24 V lights in the room, including the various panel and work lights. The lights adjust evenly, smoothly and simultaneously, changing the atmosphere of the entire space at once. With the LIMENTE SMART dimmer, you can continuously adjust the light output of the LIMENTE LED lights from 0 to 100%. A short press on the controller turns the lights on / off and a long press dims / brightens the light.
