

SMART 572

GREENLINE lightcontrol set | 24 V | white

Product code: 640572

Wireless lighting control set with color temperature adjustment - ecologically without power consumption

LIMENTE SMART GREENLINE series offers a simple and stylish solution for light control, for example in the kitchen and other areas of the home. The lights are controlled by a stylish wall switch (controller) with on / off function, dimming feature and you can also adjust the color temperature of the lights (requires CCT light version). The controllers in the GREENLINE series do not need electricity to operate, but the movement of the switch produces the necessary energy.

The controller does not need wiring but works wirelessly, so it can also be placed freely in the desired place in the room. There can be several controls to control the same lights, and with one controller you can control several different lights, making it easy to expand the system afterwards. Lighting control does not require separate electrical installations, but only needs an electrical outlet. LIMENTE SMART 556, 557 and 572 are ready-made sets with all the necessary parts to control LIMENTE 24 V lights (all spot and profile lights).

Adjusting the lights

By adjusting the lighting, you can customize it to create lighting that suits the situation in your home. By dimming the LIMENTE lights, you change the lighting in your home from efficient and bright to dim and cozy. If you wish, you can use the same switch to adjust all the LIMENTE 24 V lights in the room, including the various panel and work lights. The lights adjust evenly, smoothly and simultaneously, changing the atmosphere of the entire space at once. With the LIMENTE SMART dimmer, you can continuously adjust the light output of the LIMENTE LED lights from 0 to 100%. A short press on the controller turns the lights on / off and a long press dims / brightens the light.
