A ceiling light with integrated motion sensor

LIMENTE KASTE is a round ceiling light with integrated motion sensor with versatile adjustment options. The dome shaped shade is elegant and white acrylic. The ceiling fitting is aluminium-plated. The light reflected through the matte white shade is non-glaring and beautifully even.

KASTE has several different adjustment options, which makes the light perfectly suit your needs! You can adjust the motion sensitivity (distance from movement), the natural light level (how dark the space should be to turn on the light), and the time period (the duration of time the light will be illuminated when activated) of the fixture to your needs. It's also possible to adjust the light to only be operated with a separate wall switch.
