

PICK-4

USB (A+C) | copper

Product code: 67308

A compact recessed USB socket

The rectangular PICK-4 with rounded corners is a compact USB socket (USB-A and USB-C) that is a part of the LIMENTE PICK product series. LIMENTE PICK products are USB sockets (USB-A and USB-C) that are small in size and designed to be embedded in, for example, shelves, furniture, and tabletops. Thanks to their small size and plug-in power supply LIMENTE PICK products can also be used in other types of furniture, such as tables, sofas, and bookshelves.

The PICK product series includes four different models: the round PICK-1, the square PICK-2, the rectangular PICK-3, and PICK-4 which is a rectangular socket with rounded corners.

Color options

All PICK USB sockets have a metal frame. The sockets are available in stainless steel, black, and white, as well as in the striking new colors bronze, brushed gold, and champagne. The sockets are attractive interior design elements especially due to their new, stylish color collection.

Installation and electrical connection

PICK-4 USB socket is quick and easy to install. A round opening is made in the tabletop or, e.g., side of an island, into which the socket is placed. The power supply, which is included in delivery, is then connected to the socket. Installation does not require an electrician. The power consumption of USB ports in Pick sockets in standby mode is <0.3W.

THE FOLLOWING ITEMS ARE INCLUDED

- USB charger
- 2m supply cable
- plug-in power supply

PICK-4 SOCKET COPPER

OVERVIEW

PRODUCT CODE	67308
