Floorsocket accessories 8799ASENNUS

Limente floor sockets offer a stylish and timeless solution for distributing electricity, data, and antenna signals in all kinds of locations. Floor sockets are particularly convenient in car dealerships, supermarkets, stores, offices, commercial spaces, ships, and even in homes around kitchen islands. The washable and drive-over sockets are especially suitable for larger open spaces such as hypermarkets, car dealerships, cafes, and restaurant customer areas. Sockets intended for dry indoor installations are designed for offices and meeting or office spaces.

All Limente floor sockets are made with either aluminum or stainless steel frames, and their covers can be metal or the same material as the floor (carpet, wood, stone, laminate, parquet, etc.)

Installation

The place holders reserves the space required for the floor socket during casting, and it is replaced by the socket immediately after the floor is finished. The leveling system raises the socket to the required height from the bottom by 20mm in steps.
