### Add lights easily and quickly with the Limente-manifold

Limente -driver and Smart lighting control come with 4-6 connection points for lights, making installation fast and effortless. Especially when using cabinet lights, the need for additional connection points is often significant. With the LIMENTE-divider, you can add even more lighting points and ensure that every corner and surface receive the light it needs.

With a separate LIMENTE-divider, you can expand your lighting system easily and quickly. One manifold provides six new connection points, allowing you to create the exact lighting you desire. When selecting the manifold and the number of lights, remember to consider the maximum load (W) of the power supply to avoid exceeding it.
