An unnoticeable recessed LED profile fixture

LED-INSER is a versatile light to be used both as a working light and a mood light, e.g. in a kitchen workspace or on shelves and other surfaces where light is needed! It is an aluminum profile fixture designed to be recessed in furniture. The profile is submerged to furniture level and only a sleek thin edge of the profile is visible. LED-INSER IP44 CCT is only 8.5 mm deep allowing installation on a sheeted wall without a need to change the wall support structures. The fixture can be shortened to a desired length.

LIMENTE LED-INSER IP44 CCT is available in standard lengths of 2 and 4 meters. The fixture can be shortened to a desired length at 3,3 cm intervals. LIMENTE LED-INSER IP44 CCT comes with quality LEDs with a color rendering index of $R_a > 90$, an efficiency of 105 lm/W, a luminosity of 1500lm/m and a color temperature of about 2700-6000K. The fixture includes a matte protective glass diffuser, which makes the light even and continuous and makes the light a bit warmer in color temperature. All technical values are given to the led strip without a diffuser.
