A light directing corner profile fixture with completely dot-free strip

LIMENTE LUXOR IP44 DOB is part of the LIMENTE DOB collection, designed to offer maximum lifespan and top technical features, such as excellent color rendering. This versatile, trimmable task and mood light is suitable for all spaces where a light profile can be installed in a corner. The fixture features a wider beam angle, making it ideal for locations where light needs to be distributed generously throughout the surroundings. The seamless profile creates a polished look, and the light is elegantly continuous without any distracting joints.

LIMENTE LUXOR IP44 DOB is available in standard lengths of 2 and 4 meters. The LED strip can be cut to the desired length at approximately 3 cm intervals, allowing for various customized solutions. Only the best components are used as standard in the DOB model, ensuring excellent efficiency (up to 144 lm/W) and near-perfect color rendering (CRI >90, ensuring the colors of the illuminated object appear as natural as possible). It features a light output of 1300 lm/m and a color temperature of either 3000K or 4000K. The light from the fixture is completely dot-free, making it ideal for the low-profile Luxor housing where the strip is positioned close to the diffuser. All lighting values are provided for the LED strip without the cover.
