CORNER SOCKET SET

white | light control set + driver
Product code: 96235

A double power socket in the corner with light control

LIMENTE SMART 350 series offer a simple and stylish option for lighting control, for example in the kitchen and other areas of the home. The lights are controlled by a stylish wall switch (controller) with an on / off function and a dimming feature. Thanks to the slimness of the controller, it looks like a recessed wall switch despite the surface mounting. The controller does not need wiring but works wirelessly, so it can also be placed freely in the desired place in the room. There can be several controls to control the same lights, and with one controller you can control several different lights, making it easy to expand the system afterwards. Lighting control does not require separate electrical work, but is sufficient when there is a socket for the lights. LIMENTE SMART 350 is a complete set with all the necessary parts to control the lighting.

The controller is a stylish surface-mounted switch. On / Off works with a short press and a long press dims / brightens the light.

Color choices

Corner socket is available in three different colors: alulook, black and white. Alulook and black have a painted matt surface. White has a glossy finish.

Installation

Determine the place, where the power supply will be imported, or use an existing power supply cable. The socket must be installed in a corner.

THE FOLLOWING ITEMS ARE INCLUDED

- double socket
- wireless light control incl. driver
- receiver with quick connector and manifold
- driver 60W

COR. SOCKET SET FOR LIGHT CTRL WH
