PROLITE LED-RIBBON SET 4000K, 3M

128 led/m | 500 lm/m | Ra>80 | IP20
Product code: 96279

A versatile LED strip and driver

Efficient, cuttable LED strip, where the LEDs are very close to each other (140 LEDs / meters). The ribbon is used in kitchen lighting as an indirect light, for example behind the mirrors, in plinths, in furniture, in ceilings, and anywhere where the lamp needs to be as invisible as possible. Especially when installed in a LIMENTE LIGHTING PROFILE, the light is pleasantly continuous and even.

High-quality LEDs are used as standard, with a color rendering index of CRI>80, luminous efficacy of 130 lm/W, luminous flux of 1300 lm/m and a color temperature of 4000 K (minor color temperature variations may occur between production batches). The strip comes standard with a 5 cm + 300 cm long cable at both ends. If this is not sufficient, you can order an extension cable (3 m), product number 681588. A maximum of 1 extension cable can be connected per fixture's cable, making the maximum cable length up to six meters. The power supply cable at both ends allows the utilization of the LED strip in two sections. This way, unnecessary waste pieces are avoided, and it also enables the installation of the strip in two different directions from the power source.

Dimming and lightcontrol

By adjusting the lights, it is easy to create appropriate lighting for different occasions. By dimming LIMENTE LED-strip you can change your home's lighting from efficient and bright to dim and cosy. You can use the same switch to adjust all the LIMENTE lights in the room, including various ceiling-, panel- and profile lights. The lamps adjust smoothly at the same time, while simultaneously changing the ambience of the space.
