

LIMENTE PROFILE NEONMINI

without led-strip | aluminium 2 x 1m

Product code: ALUNEONMINI

NEONMINI-35 profile – discreet ambient lighting

The NEONMINI aluminum profile is specifically designed for the installation of the NEONMINI-35 strip. This ultra-compact and discreet profile allows for a clean surface-mounted installation of the strip, while ensuring a seamless finish when the luminaire is intended to be recessed into the interior, making it nearly invisible.

The profile is an excellent choice for grooves made in the sides of closets, furniture, and for ambient lighting in toe kicks and countertops—as well as anywhere you want the light source to remain hidden from view.

Adjusting the lighting

The LIMENTE NeonMini is dimmable with the LIMENTE SMART 512 IR door switch. LIMENTE SMART 512 IR door switch acts as an automatic door ON / OFF switch or when used as a door switch, the switch turns on the lights when the door is opened and turns them off when the door is closed.

Installation

NEONMINI profiles are cut to the desired length using a hacksaw or a circular saw, after which the profile is fixed in place using either screws or adhesive. The NEONMINI-35 strip (ordered separately) completes the installation when it is pressed firmly into the profile. Using the profile ensures a perfectly straight and stylish result, which would not be possible with individual clips alone. Please note that the profile is delivered without clips or screws, so please choose the mounting method best suited for your installation site separately.
